SAKSHI UTTAM WALUNJ

B.Tech. - CSE - Artificial Intelligence & Machine Learning

Email: 202502110007@mitaoe.ac.in

Pune, Maharashtra, India - 412105

LinkedIn: https://www.linkedin.com/in/sakshi-walunj-04b48238a

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate pursuing B.Tech. at MIT Academy of Engineering, with a Diploma in Computer Engineering and hands-on experience in Python, Java, Full-Stack Development, Machine Learning, AI applications, Power BI, and Oracle SQL. Interested in building practical AI/ML and full-stack solutions, with experience in academic projects, research, and technical training.

KEY EXPERTISE

Python | Java | MongoDB | Oracle Database | Javascript | NodeJS | AI&ML

EDUCATION

MIT Academy of Engineering, Pune 2025 - 2028

B.Tech. - CSE - Artificial Intelligence & Machine Learning | CGPA: **8.52** / **10**

jaihind polytechnic kuran, kuran 2025

Diploma | Diploma - Computer Engineering | MSBTE | Percentage: **91.77** / **100**

Smt.Reubai Balaji Deokar Vidyalay wadgaon Anand, Wadgaon Anand 2022

10th | MSBSHSE | Percentage: **91** / **100**

INTERNSHIPS

Innovatus Technologies 03 Jun, 2024 - 13 Jul, 2024

Key Skills: Java

Completed a 6-week inplant training program focused on Java Full Stack desktop application development. Worked on the design and implementation of an Automatic Question Paper Generation System, applying core programming concepts, logic building, and structured development practices. Gained hands-on experience in backend logic development, database handling, and building functional desktop applications. Strengthened problem-solving abilities through aptitude training and real-time project exposure in a professional environment.

PUBLICATIONS / RESEARCH / WHITE PAPERS

HUMAN INTRUSION DETECTION AND ALERT GENERATION SYSTEM THROUGH AI

International Journal of Research and Analytical Reviews (IJRAR) | **No. of Authors:** 4

This paper focuses on improving traditional CCTV surveillance systems, which mainly rely on manual monitoring and often fail to quickly identify unauthorized individuals. Existing systems lack real-time face recognition, suspicious activity detection, and automated alert mechanisms.

The main problem addressed is the delay and inaccuracy in detecting intruders in restricted areas such as warehouses or private facilities. Manual monitoring increases the chances of human error and slow response times.

To solve this, the paper proposes a real-time AI-based surveillance system using YOLO and SCRFD for detection, ArcFace for face recognition, and 3D CNN for identifying suspicious activities. The system can differentiate between authorized personnel and intruders, send automated alerts via email, SMS, and phone calls, and escalate cases if necessary. Under controlled testing conditions, the system achieved over 90% accuracy

ASSESSMENTS / CERTIFICATIONS

Cloud Computing Workshop

Provider: Innovatus Technologies

Key Skills: Cloud Computing Fundamentals | Cloud Infrastructure | Virtualization | Cloud Deployment

Gained foundational knowledge of cloud computing concepts, services, and infrastructure. Explored cloud deployment models and the role of cloud technologies in scalable and efficient computing.

AI and Machine Learning Workshop

Provider: Innovatus Technologies

Key Skills: Artificial Intelligence | Machine Learning Fundamentals | Data Analysis | Predictive Modeling

Learned core AI and machine learning concepts, including data-driven problem-solving and predictive techniques. Explored practical applications of intelligent systems in real-world scenarios.

Paper Publication

Provider: IJRAR

Key Skills: AI-Based Research | Technical Writing | Research Analysis | YOLO | ArcFace | 3D CNN

Co-authored a research paper on an AI-based human intrusion detection and alert generation system. Explored real-time surveillance using object detection, face recognition, and suspicious activity detection techniques.

Claude Code in Action

Provider: Anthropic

Key Skills: AI-Assisted Coding | Code Generation | Debugging | Developer Productivity | Workflow Automation

Gained practical experience using Claude Code for AI-assisted software development, including code generation, debugging, problem-solving, and improving development workflows.

Claude with Amazon Bedrock

Provider: Anthropic

Key Skills:

AWS Bedrock | Generative AI | Claude Models | Prompt Engineering | API Integration | AI Application Development

Gained practical knowledge of building generative AI applications using Claude models on Amazon Bedrock, including model interaction, prompt engineering, and AI application development.

Fundamentals of Deep Learning

Provider: NVIDIA

Key Skills:

Deep Learning | Neural Networks | CNNs | Computer Vision | Model Training | Transfer Learning | PyTorch | NVIDIA GPUs

Completed NVIDIA's Fundamentals of Deep Learning course, gaining hands-on understanding of neural networks, CNNs, model training, computer vision, and deep learning workflows using GPU acceleration.

CO-CURRICULAR ACTIVITIES

- Conducted AI-based research and contributed to a research publication.
- Participated in AI/ML workshops and technical training programs.

EXTRA CURRICULAR ACTIVITIES

- Participated in inter-collegiate and institutional sports activities.
- Active member of the AMIEEE Student Chapter at MIT AOE.

PERSONAL INTERESTS / HOBBIES

- Building AI/ML Projects
- Playing and Following Sports
- Exploring Emerging Technologies
